

Simapon Kankul

Physics Undergraduate - Year 4 - Internship Candidate

 Simaponkk@gmail.com  065-878-3212  Thailand

EDUCATION

Khon Kaen University | Bachelor of Science (B.Sc.) in Physics

Duration: 2023 – Present

Expected Graduation: May 2027

GPAX: 3.09 / 4.00 Relevant Coursework: Computer Programming (Python), Data Science, Machine Learning

Scholarships

- Good Academic Performance Scholarship, Department of Physics, Khon Kaen University (Academic Year 2025, Semesters 1 and 2)
- Awarded for outstanding academic achievement and exemplary conduct.

EXPERIENCE & ACTIVITIES

Vice President of Academic Affairs | 2nd Road to Physics Camp (3rd Year)

- Led the academic team in designing curriculum and learning frameworks for camp participants.
- Coordinated with faculty professors and efficiently managed all academic documentation.

Exhibition Officer (NSM Pa – Tangram Booth) | National Science Week (3rd Year)

- Facilitated interactive Tangram activities to explain scientific concepts to diverse age groups, enhancing public speaking and communication skills.

Audio-Visual (AV) Officer | 1st Road to Physics Camp (2nd Year)

- Captured event photography and utilized Adobe Lightroom and Premiere Pro to produce promotional video recaps.

Exhibition Creator (Simple Motor Booth) | National Science Week (2nd Year)

- Designed and presented hands-on physics experiments to students and the general public.

Academic Committee & Physics Tutor | Voluntary Physics & Guidance Camp (1st Year)

- Tutored and conceptualized fundamental physics topics for high school students preparing for university entrance.

Registration Officer | National Science Week (1st Year)

- Managed the registration desk and welcomed attendees, ensuring an organized and seamless entry process.

PROJECTS

Data Science Projects

Customer Purchase Behavior Analysis and Prediction (Data Science Mini-Project)

- Developed and optimized Machine Learning classification models to predict customer purchasing behavior and promotion responsiveness.

Bike Buyers Prediction Model (Data Science Mini-Project)

- Conducted data cleaning and preprocessing on a sample dataset of 1,000 profiles.
- Built a classification model to identify and predict target customer segments with a high propensity to purchase bicycles.

SKILLS

Data & Programming: Python (Basic), Data Analytics, Machine Learning, Microsoft Excel

ExcelDesign & Media: Adobe Photoshop, Adobe Lightroom, Adobe Premiere Pro, Canva

Soft Skills: Team Collaboration, High Accountability, Open-mindedness, Problem-Solving
